

UGE DESTINY ENANEFE

FULL-STACK WEB DEVELOPER | PRODUCT DEVELOPER | BUSINESS STRATEGIST

Effurun/Warri, Delta State, Nigeria | Open to Remote Roles | +234 816 788 3281 | ugedestiny6@gmail.com
[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Gleenc](#) | [Tekagon](#)

PROFESSIONAL SUMMARY

Full-stack web developer and product strategist who turns business ideas into functional, user-centered digital products. Experienced in building and deploying responsive web applications, REST APIs, multi-role dashboards, e-commerce workflows, payments, messaging, verification, and delivery systems. Combines React, TypeScript, Node.js, Express, MongoDB, and PostgreSQL engineering with product planning, UX research, UI/UX design, project coordination, and commercial strategy. Founder and lead builder of Gleenc, with hands-on ownership from discovery and architecture through testing, deployment, and early-market validation.

CORE TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, responsive design, PWAs

Backend & Data: Node.js, Express.js, REST APIs, authentication and role-based access, MongoDB, PostgreSQL/Neon, SQLite

Cloud & Integrations: Git, GitHub, Vercel, Render, Docker, AWS, Firebase, Paystack, Cloudinary, Brevo SMTP

Product Development: Requirements, product strategy, UX research, UI/UX design, user flows, wireframes, prototypes, usability reviews, roadmaps

PROFESSIONAL EXPERIENCE

GLEENC

2026 - Present

Founder | Lead Full-Stack Product Developer & Business Strategist | *Remote / Delta State, Nigeria* | beta.gleenc.com

- Conceived and built a beta social-commerce and local-delivery PWA connecting buyers, campus and local-market sellers, used-market vendors, riders, and administrators.
- Developed the React, TypeScript, Tailwind CSS, and Vite frontend alongside a Node.js and Express backend, including role-based authentication, REST APIs, and responsive dashboards.
- Designed complex commerce workflows covering seller onboarding and verification, product moderation, cart and checkout, Paystack payments, seller subscriptions, order management, dispatch, delivery verification, messaging, disputes, and payouts.
- Worked across MongoDB, SQLite, and Neon PostgreSQL; integrated Cloudinary media handling and Brevo email services; deployed and maintained frontend and backend services on Vercel and Render.
- Led product discovery, UX research, UI/UX decisions, feature prioritization, testing, debugging, launch planning, rider operations, and business-model development.
- Validated early demand by onboarding 20 verified buyers and 15 verified sellers within one week during the platform's testing phase.

TEKAGON

2025 - Present

Founder | Full-Stack Web Developer & Product Strategist | *Remote* | tekagon.vercel.app

- Built a responsive technology and digital-product platform that helps businesses translate ideas into functional websites and web systems.
- Developed the frontend with HTML, CSS, and JavaScript and the backend with Node.js and MongoDB, including dashboard, service, technology-stack, contact, ticket, and content experiences.
- Created reusable interface patterns, responsive layouts, interaction states, navigation behavior, and a consistent dark visual system across desktop and mobile views.
- Managed source control and releases through GitHub, deployed the frontend on Vercel and backend on Render, and aligned technical delivery with client and business goals.

PROFESSIONAL EXPERIENCE - CONTINUED

KUCREDIT

Product Engagement

Product Design & Development | Remote

- Contributed to product development by translating business requirements into clearer user journeys, interface concepts, and implementation-ready product direction.
- Applied UI/UX design and UX research methods within the product-development process to identify user needs, reduce friction, and improve feature clarity.
- Connected business strategy with product and technical decisions, supporting practical prioritization and a more coherent digital experience.

TECKIQ

2022 - 2024

Web & Product Designer / Frontend Developer | Remote

- Designed and developed responsive websites and digital interfaces using HTML, CSS, JavaScript, and React, moving work from initial requirements to functional implementation.
- Created wireframes, prototypes, reusable interface components, and responsive layouts while considering accessibility, visual hierarchy, and cross-device usability.
- Used user research and usability reviews to improve flows and interactions, keeping UI/UX work tied to product goals and development feasibility.
- Supported brand consistency and marketing needs with Figma, Adobe Photoshop, and Adobe Illustrator while collaborating across design and development tasks.

EDUCATION & PROFESSIONAL TRAINING

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, EFFURUN (FUPRE)

Expected 2027

Bachelor of Engineering (B.Eng.), Chemical Engineering | Effurun, Delta State, Nigeria

- Undergraduate engineering training strengthens analytical thinking, quantitative problem-solving, systems reasoning, documentation, and structured project execution.

EDO BIT ICT ACADEMY

Professional Diploma

Diploma, Web Design & Graphic Design | Nigeria

- Built foundational capability in web design and development, interface structure, visual communication, and practical digital-production workflows.

ADDITIONAL TECHNOLOGIES & CAPABILITIES

Engineering: API integration, debugging, performance-minded responsive development, database migration, deployment, environment configuration, Git workflows

Product & Business: Product roadmaps, market validation, stakeholder requirements, feature prioritization, project coordination, go-to-market thinking, e-commerce strategy

Design Support: Figma, Adobe Photoshop, Adobe Illustrator; UI/UX and UX research applied within product development

PROFESSIONAL STRENGTHS

End-to-end ownership | Product thinking | Structured problem-solving | Clear communication | Remote collaboration | Technical troubleshooting | Continuous learning | Business-minded execution
